

## **Nteligen® Selected by Air Force for ABMS Contract with \$950M Ceiling**

COLUMBIA, MD, September 30, 2022 – Nteligen®, LLC, has been awarded a \$950,000,000 ceiling indefinite-delivery/indefinite-quantity contract for the maturation, demonstration and proliferation of capability across platforms and domains, leveraging open systems design, modern software and algorithm development in order to enable Joint All Domain Command and Control (JADC2). This multiple award contract provides awardees the opportunity to compete for efforts within seven different competitive pools that support the development and operation of systems as a unified force across all domains (air, land, sea, space, cyber, and electromagnetic spectrum) in an open architecture family of systems that enables capabilities via multiple integrated platforms. Future work under this multiple-award Indefinite Delivery/Indefinite Quantity contract will be competed via the Fair Opportunity process.

Nteligen® will apply its Proactive Cyberthreat Mitigation™ approach to reducing the risk of sharing information across multi-level security domains to the complex platform architecture.

“We are honored to partner with the Air Force in developing ABMS. Our expertise in engineering resilient solutions that move data between various security domains will revolutionize JADC2 security architecture, helping leaders make better decisions, faster,” said Joseph Karolchik, President of Nteligen®.

### **About Nteligen®**

Nteligen® is a Columbia, MD, based small business that designs and develops secure platforms for information sharing, with special emphasis on controlled interfaces and cross-domain solutions (CDS). Nteligen’s® ProActive Cyber Threat Mitigation™ approach helps you identify what’s valuable in your data, understand your risk tolerance against damage to or loss of valuable data, and implement methods to reduce risk. Our approach helps you think like a chess grandmaster, planning 20 to 25 steps ahead of the bad actors to limit harm or loss should a cyber attack occur. For more than a decade, Nteligen® has been engineering resilience for the Department of Defense (DoD) and Intelligence Community (IC).

### **About ABMS**

The Advanced Battle Management System, or ABMS, is the Air Force’s latest push to create a next-generation command and control system. It is also the service’s contribution to Joint All-Domain Command and Control, or JADC2, the Department of Defense’s vision for seamless and lightning-quick communication regardless of domain or national affiliation.
